Church School 2 p.m.
Missionary boxes may be brought in this Sunday—a last opportunity.

All the supporters and friends of the school are urged to help the children in the matter of punctuality.

Public Worship, 7:30 p.m.

The world at large very highly esteems Dr. Grenfell, of Labrador, approving almost without question his work among the fisherfolk of that coast. The Minister's message will be based on Dr. Grenfell's latest book, "What Christ Means to Me."

Come and enjoy a helpful hour on Sunday evening. Bring your friends.

N. W. Whitmore, Minister.

Forks

Public worship on Sunday next at 2 o'clock, conducted by Rev. N. W. Whitmore.

Sermon topic same as for

Empress. Everybody welcome.

Do Something for Somebody

Do something for somebody sometimes. While jogging along life's road:

Help someone to carry his burden,
And lighter will grow your load.

Do something for somebody gladly:

It will sweeten every care;

In sharing, you will find

Your own are less hard to bear.

Do something for somebody stringing

To help where the way seems long,

And the homeless hearts that languish

Will cheer up with a little song.

Do something for somebody always,

Whatever may be your need;

There's always someone who'll help you

So much as a kindly word.

Rev. R. W. Hibbert, B.A., who was here over the weekend in the interests of Sunday School work, left on the West passenger train, Tuesday morning.

Local Hospital Installs New Equipment

The new Sorenson apparatus lately installed in the hospital here, to bring the equipment thoroughly up to date for tonsil work, has already proved its usefulness.

It minimizes the risk to the patient by enabling any slight bleeding to be checked promptly. It also assists in keeping the patient anesthetized and considerably reduces the time required for each operation.

The entire apparatus is about the size of a club bag, compact and readily carried from place to place. It derives its power from a one-twentieth horse power motor, driven by the Dole plant of the hospital.

Here and There

An honour was conferred upon Captain James Turnbull, C.M.E., R.N.R., commander of the Canadian Pacific steamship Montmorency, when he was appointed Aide-de-Camp to His Majesty King George V.

All golfing records were shattered recently when K. Tanaka, local Japanese golfer, playing on the Canadian Pacific course "Langara," secured a hole-in-one in the second round of six iron-hole links. The first was obtained at the fifth hole which is 15 yards, and the second at the sixteenth hole, which is 210 yards.

During the month of January of the present year automobile production in Canada has increased 98 per cent over and above the production for the corresponding month of 1926. A 1927 model car, as compared with 7,752 cars in the previous year, almost half of the cars produced were for export, according to the Dominion Bureau of Statistics.

In memory of late Col. George H. Ham, of Montreal, dean of railway public men in North America, a beautiful memorial portrait is being erected in the dining room of John's Coach at Whitemud by the members of the Women's Canadian Press Club. The late Col. Ham died in Montreal on April 16 last.

Nara, Japan.—Eleven passengers on the Round-the-World cruise of the Canadian Pacific flagship Empress of Scotland succeeded in a remarkable feat in getting past a colossal image of Buddha in the Buddhist Temple here yesterday, thereby achieving, according to ancient tradition, the short road to Paradise.

We are agents for all magazines and newspapers. Give your orders to the "Empress Express."

Dr. H. Hoffer, dentist, will be in Empress, Friday April 8th, and thereafter, Thursday as usual.

Mayfield

A special business meeting is called for Wednesday, April 6th, at the Community Hall, at 8 p.m. To discuss business, elect officers and arrange for the opening. Everybody interested is urged to be out. If you have not bought a share by money or by work, it is not too late; or you are needed now, and we invite you.

—The Committee.

Local Play

The local talent play, "The Jury of Our Peers," was staged in the Empress Theatre, on Wednesday night. In spite of bad condition of roads there was a very good attendance and the presentation was well received. Leader, Estuary and Bindloss people attended. A fuller report will appear next issue.

Provincial Finances

The annual review of Alberta's finances was presented to the Legislature in session at Edmonton last week by Hon. R. G. Reid, Minister of the Treasury. In view of the fact that the financial year of the Government is to be changed to March 31st of each year, Mr. Reid presented estimates covering the eighteen months to March 31st of 1928.

For the calendar year of 1927, he estimates that there will be a surplus in the provincial treasury of more than \$26,000, with another \$20,000 for the first three months of 1928, making a total surplus of more than \$46,000.

The total estimated revenue for 1927 shows an increase over the actual revenue for 1926 of \$58,000, and the estimated expenditures for the present year show an increase over the actual expenditures of 1926, of \$80,500.

Two new taxes were announced, the first being a five per cent tax on the turn-over of all parimutuel machines in the province, and the second being an additional tax of one cent a gallon on gasoline. The first is expected to bring \$100,000 into the treasury and the second, \$280,000.

On Monday afternoon he visited the school and gave a very fine talk to the boys and girls on "The World Youth Movement." On Monday evening he helpedfully discussed with a dozen teachers problems related to the teaching of religious truths.

Afterwards the Rev. Hibbert's visit to our town should be of benefit to the adults and children, all of whom enjoyed his interesting and instructive talks.

The Late Angus McIntosh

The following obituary notice is taken from the list of notable deaths appearing in the "Family Herald," and is the obituary notice of the father of Mrs. H. J. Read—"Mr. Angus McIntosh, of Brantford, Ont., died at the home of son, D. J. McIntosh. Mr. McIntosh was born near Brantford, in 1850 and was a schoolmaster for a great many years in Brantford, Toronto and elsewhere, until he retired in 1912, going to make his home. His first school was Little's School, near Guelph, where he taught from 1870 to 1872. From 1872 to 1884 he was at Brantford College, assisting, in 1884 to Toronto to teach. Mr. McIntosh was Principal from 1887 until his retirement in 1912."

A Helpful Visit

The visit of Rev. J. W. Hibbert, General Secretary of the Religious Education Council of Alberta, was very much enjoyed by many over the last week end. Good congratulations greeted him at the Forks as well as in Empress.

At the Sunday evening service he took for his subject the life of David. How, at that time, parents were wholly responsible for the schooling and religious training of the children. The home was a combination of these two responsibilities for the child's education. How, while institutions today give to the children this education, the home was still responsible to these institutions for assisting in their general work. The speaker told the young folk that David had no easy road to success. That like talented people his success in playing on the harp and in the use of his sling, had only been gained by assiduous practice.

The value of child life and statements made by Jesus Christ in this regard were other points of the address.

On Monday afternoon he visited the school and gave a very fine talk to the boys and girls on "The World Youth Movement." On Monday evening he helpfully discussed with a dozen teachers problems related to the teaching of religious truths.

Afterwards the Rev. Hibbert's visit to our town should be of benefit to the adults and children, all of whom enjoyed his interesting and instructive talks.

O. Johnson of Bindloss, suffered a fractured left arm on Friday night. He was here for two days, then X-rayed at Swift Current. Mr. Johnson is now doing well.

Bill Grudeck, returned on Monday night from Medicine Hat where he had been for an X-ray of the skull and neck and subsequent operation after two weeks preliminary treatment in the Empress hospital. He is now doing well.

Born—To Mr. and Mrs. J. Morgan, of Bustard, Tuesday, March 28, a son. Mother and child doing well.

Early Vegetables

Early vegetables may be had by holding over green vegetables from year before, by growing during the winter in the cellar, by growing in the early spring in the hotbed, and by growing certain perennial vegetables.

Roots such as carrots, beets and onions can be packed in soil in the cellar and kept crisp and fresh till spring, eddahage may be suspended from the ceiling or carried on slatted shelves in the cellar throughout the winter and celery and Swiss chard may be carried till Spring with the roots packed in moist earth. All this pre-supposes a well ventilated cellar with controlled temperature.

Rhubarb roots brought into the cellar after they have been frozen in the fall or any time during the winter, if planted in a box or tub of rich soil, will send out a heavy crop of long tender stalks. The time of this may be controlled by the time of bringing in the roots after they are frozen. It usually takes about six weeks for the stalks to develop from the time the roots are brought into the cellar.

Lettuce and radishes may be sown in the early Spring in the

Sunday School Entertain Departing Members

On Saturday evening a social gathering was held in the Sunday School room of the United Church, by the ladies of the Sunday School and various societies, to bid farewell to Mrs. W. C. Boyd, Mrs. H. E. Reid and Mrs. W. Torry who are leaving the town to take up their residence in other parts. The time was spent in contests, music and short speeches and social intercourse. At the conclusion of the evening's entertainment a very acceptable lunch was served.

Larger Proportion Of British Emigrants Is Looked For This Year

Winnipeg.—Under the provisions of the new immigration act, reached between the Immigration Department and the Government and the railways last September, it should be possible for the railway companies of Canada to show a large increase in immigrants during the year. Mr. D. Robb, vice-president of colonization, natural resources and telegraphs of the Canadian National Railways,

"Last year," stated Mr. Robb, "the number of immigrants handled by the railways was 128,000. This year I look to see that figure increased to at least 155,000 and possibly 200,000."

Under the terms of the new agreement, the agents of colonization departments in the railroads will be enlarged, particularly with reference to activities in the British Isles, and Mr. Robb expects to see a much larger proportion of immigrants arrive from Great Britain than at any time since the first year of the war. He also said it will assist in securing settlers from the Scandinavian countries.

The Canadian National Railways do not have any direct immigrants passing through the Canadian Pacific, but the Canadian Pacific we believe that because of the far-flung character of our organizations, we are in a better position than any other organization to attract a large number of immigrants without injury to native-born Canadians. Hon. Robert Pocock, minister of immigration, apparently agrees with us in this view and is personally making every reasonable effort in latitude to help us in this direction.

To Tour Western Canada

Governor-General and Vicountess Willingdon Will Visit West
It was decided yesterday by Governor-General and the Queen's Household staff to leave Ottawa on Sunday, March 19, on an extended tour of Western Canada. It is proposed to pay a similar visit to the territories in July.

In view of this announcement, officials of the government general's office and their excellencies would stop off at all the capitals of the western provinces, and most of the principal cities. It was proposed to return to Ottawa about May 1.

To Protect Empire Goods

London.—At a meeting of the Bill of Lading Protection Society organized to protect the interests of importers in Canada, tended to apply the word "scuttle" to goods containing a portion of foreign material, thus destroying the same extent the value of the entire importation, as well as the cost of insurance, and the loss of Empire goods. The meeting decided to investigate the extent of the practice and ascertain what remedies could be applied to do away with it.

Canada's Share in Reparation

London.—Sir Austin Chamberlain, foreign secretary, referred in the House of Commons to the fact that the sum of £2,500,000, paid to November 12, 1926, amounted approximated to £7,500,000 which has been paid over. This was stated in the House of Commons by Winston Churchill, chairman of the executive committee in charge of questions.

Shanghai's Defence Is Strengthened by Arrival Of British Royal Marines

Shanghai.—Shanghai's international settlement welcomed 1,000 Royal Marines from the British forces who were landed to strengthen the forces which already have taken up positions for the defence of the district.

Meanwhile, news was received that the Canadian government had executed several minor raids on British held territory, and that a major effort will be a thrust toward the Nanking railway to cut off the defending Shanghainese forces from their bases rather than a continuation of their effect advance from the south.

While the general movements of the armed forces continued, garrisons within the city were urging an attempt to break down the administration of the international settlement.

Reindeer Investigation

Government Would Provide Food Supply For Neves of North Country

Ottawa.—A memorandum has been received by the Northwest Territories branch of the interior department from the Parasol holder of Port Barrow, Alaska, reporting on the condition of the reindeer in the arctic.

The Danish brothers are now on a 1,250-mile trip across Alaska and the extreme north coast of Canada making an investigation into the possibility of more reindeer from the Canadian territories to maintain the food supply for the natives. North is in danger of extermination, and the survival of the Eskimos is dependent upon the caribou which have come into the country last June and will not come until the spring of 1928, when they will make their report to the Dominion Government on all aspects of the situation and the possibilities.

It is understood that a light machine will comprise the squadron, which will establish its base at Hudson Bay, and the equipment will be carried by pack train. The party will consist of twelve officers and 25 men who will be employed in training for the flight.

Serge Perry, engineer and Corp. Semple, carpenter, have also been engaged by the Hudson's Bay Company to go along.

Exhaustive Tests Are Made On the Comparative Merits Of Garnet and Marquis Wheat

After having conducted extensive tests on the comparative merits of Garnet and Marquis wheats, the two early maturing cereals developed within the last few years by the Federal Department of Agriculture, it is said, "we cannot recommend Garnet as a substitute for Marquis in districts where the latter variety may be dependent upon to thrive successfully." The report points out, however, even in such districts where conditions are similar to the proper development of Marquis wheat, it may often be preferable to plant the former to cultivate Garnet wheat in parts of the districts.

The report points out that "from the standpoint of milling and baking qualities, Garnet undoubtedly does not rank as high as Marquis, all things considered, although it seems entitled to a place among the good milling wheats. The chief point of baking which Garnet is open to criticism is in color of the flour. This without doubt is more 'creamy' than Marquis. Since, however, bleaching and other processes can be used to slightly develop and are being generally practiced, the objection of the color of Garnet would appear to be appreciably minimized."

Commenting on the result of the comparison between the two wheats, the report says that "generally speaking, the flour of Marquis absorbs a little more water than that of Garnet and, consequently, is inclined to produce a little thicker bread." Garnet, however, by maturing from five to ten days earlier than Marquis, has a decided advantage in the early frost belt.

The report concludes the result of the experiments as follows: "On the average of all tests conducted to date on the federal experimental farms and stations as well as on provincial farms, Garnet outdoes Marquis in yield and quality and may prove to be a significant difference in yielding ability between the former variety and Marquis. This statement would seem to apply pretty generally to tests conducted by farmers as well."

"On the other hand, Garnet appears capable of outyielding Marquis by a substantial margin in specified districts, notably those in which an early variety has a distinct advantage."

"Yield differences from five to ten days, either than Marquis and about a day ahead of Ruby. Under certain conditions the difference in maturity between Garnet and Marquis may be considerably greater than the above."

"In the case of some grain experiments to come between Marquis and Ruby, being slightly stronger than Ruby, but not quite so strong as Marquis. Under some conditions, however, Marquis shows slightly greater strength."

"Tests conducted at the most research laboratory, Winnipeg, Garnet did not display any resistance to any of the seven physiological forms of stem rust."

"Marquis, in this variety may not possess rust resistance. It may prove of value in rust areas by partially escaping stem disease, owing to its ability to mature early."

In the case of the original Marquis, Ontario experiment farms and stations in the prairie provinces in 1921 and 1925, Garnet weighed slightly less per measured test bushel than Marquis, while the other two cereals, namely, the Dominion farms at Brandon, Indian Head, Estevan, and Lacombe over a period of six to eight years, show that Garnet and Marquis averaged 62 pounds and 63.9 pounds per measured respective bushel. While the capacity of marquis is ample, Garnet appears to equal, if not to exceed, Marquis in weight per bushel. Thus, over a 12 year period in Ontario, Garnet averaged 61.1 pounds and Marquis, 62.7 pounds per bushel.

Pure Bred Stock

In the last ten years pure-bred horses have increased in number in Canada and number, with 150 per cent, according to Hon. J. S. Martin, Ontario Minister of Agriculture. The value of Canadian live-stock, he said, is \$75,000,000, a third of which is owned in Ontario. A marked improvement is seen in the ease of sheep and hogs.

A formula has been recently discovered, by which a history in the home makes what is believed to be practically undesirable glass.

Fox Farming Flourishes

45,000 Foxes Imported and Tattooed for Registration Purposes

During the inspection season which lasted from October 1st January, 1925, 45,000 foxes were imported and tattooed for registration purposes according to the annual report of the Dominion Department of Agriculture.

The pure crop was an average one and the price for the foxes were reported as ranging from \$1.50 to \$2.50 per head. As usual, thousands of foxes were exported to the United States and in addition a number of European countries came to Canada for foundation stock, including Germany, France, Italy, Switzerland, Austria, Britain, Norway purchased 500 pairs and Russia gave some of her famous sable in exchange for silver foxes. Having established a market in Europe, fox breeders are looking forward to a good trade for some years to come.

Advocates More Sheep

Canada Should Produce a Greater Share of Our Wool

Appeasing most sheep on the northern plains, Canada the Dominion Livestock Commission, speaking at the annual meeting of the Ontario Sheep Breeders' Association, stated that farmers need not be afraid of extending their sheep holdings.

The Dominion representative said, "The report says that 'generally speaking, the flour of Marquis absorbs a little more water than that of Garnet and, consequently, is inclined to produce a little thicker bread.'

Airplanes Saving Forests

Pilots Not Only Spot Fires But Help Counter Them

Ernest V. Phinney, Minister of Lands and Forests in the Legislature, "we have

the same number of fires starting fires in the bush. Now we can't control the idiot who throws a burning cigarette butt or who can spot a fire when it is still small and prevent it from spreading."

How is it done? Ask the "Falcon," for instance, says Mr. Phinney. "On July 4, 1925, at 4 o'clock in the afternoon, 150 men were dispatched to the annual report of the Dominion Department of Agriculture.

The pure crop was an average one and the price for the foxes were reported as ranging from \$1.50 to \$2.50 per head.

Having established a market in Europe, fox breeders are looking forward to a good trade for some years to come.

Well, the "Falcon" flew direct to its base at Pine Ridge, 45 miles distant, for assistance. It flew the course 12 times that day putting in more than three hours of flying time.

It was 10 o'clock when the first pilot, Mr. Phinney, spotted a fire in a field of tall grass. "I'm going to have a half dozen men over there," said Mr. Phinney.

He sent his men to the scene of the fire, transported men, men, 1,500

pounds of food, innumerable blankets, 200 feet of hose, extra pump, two canoes and other materials with which to prevent the spread of the conflagration.

Furthermore, Pilot Rouse also flew his "beat" to Lake Seul to bring in three extra fire-fighters. At 7 o'clock the same night the fire was out, with less than an hour's work for other consumers.

"It is a remarkable record," said Mr. Phinney. "I'm only one man, but I have a half dozen men over there, our planes, no radios, not even speed, but conquer them."

The Falcon, according to figures supplied by Mr. Phinney, spends approximately \$1,600,000 per year on forest fire protection.

It is worth it?

Well, in 1925, there were 16,600 forest fires, 1,000 of which were destroyed by fire.

That was in 1925, although the Province reported 1,015 fires—only 50 fewer than the previous year.

There's a reason for that, unquesionably.

"And the 'Falcon,' for instance, can get there," says Mr. Phinney.

Manitoba Tax Collections

Increase Shown for 1925 of Over Half Million over Previous Year

Provost Commissioner of the Manitoba Tax Commission for the calendar year 1925 exceeded \$5,352,000, or an increase of more than \$600,000 over the figures for the previous year, and the total amount of taxes collected by the Province of the Canadian dominion taken in the Legislature by Hon. D. L. MacLeod. These figures are thought to point to an other surplus to be announced by Premier John Bracken at the close of the fiscal year, ending April 20th. Vice versa, the amount revenue produced show increased amounts as compared with 1925.

Live in Two States

State boundary lines mean little in the lives of Mr. and Mrs. Dwight Charles, through whose home runs the Maine-New Hampshire state line.

Mr. Charles eats his meals in Maine, takes his vacation in New Hampshire, sleeps in his home in New Hampshire, and sleeps in New Hampshire.

These lines are the boundaries of the Canadian province of Quebec.

They lead in Maine and sleep in New Hampshire.

The Cordigan Dress is Modish

Exceedingly smart to the attractive cardigan dress shown here, and a style suitable for both the maid and the woman. It is made of a fine ribbed fabric, inverted plait in front and back, is joined to a daintily finished collar in one, a vest, and smart patch-pockets. The long, flared fitted sleeves are fitted with wide cuffs and fasten in front. No. 1526 is for ladies and maidens, and is in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, Druggist Gave Her Advice

Miss Ruth Horowitz, Bronx, N. Y., writes: "Having been troubled with a bad cold and having been advised by my physician, my druggist advised me to try CARTER'S LITTLE LIVER PILLS. He said they are good for a hundred different ailments. If people only knew how valuable they can really be, then since I am taking them, why don't you each night? I like to give my advice and gain most satisfaction."

"I have suffered from sick headache, indigestion, biliousness, throat and achy feeling, when due to constipation, will find relief in taking CARTER'S LITTLE LIVER PILLS."

CHAPTER XXIX—Continued

He was now reluctantly said, nor in particular did he want to be seen apart from him, and spoke as if valuing a certain thought. A frown came into his forehead.

"There are no good memories to have," he said. "This sort of thing gives them away."

That same evening he was alone in his room, in open wonderment. His wonderment was a mark; she conceded it skilfully.

"No memory has a sting," John, she returned. "That is the kind of memories that are worth while treasuring. The more we miss them, the more we shall desire to recollect them. I recollect of them. I've put a little bit of that home we used to plan into every one of these things to tell him here. Funny, isn't it?"

"The house, if I remember, was to let a room. This is to be the house at night. I can't understand what part of one could be built into the other."

"Love, John," from the other end of the room, where he lay prostrate, "I am so glad to have you; my dearest friend. I am so glad to have you; you would have butted and not run. It was you, you know, who said just now, that after all, I must be the man and you the woman in the marriage. At least, I expect nothing more."

He was silent. She left him for a moment to give an order to the Amato gardener who supervised the setting of the flowers which were to be in full bloom for a night and then wither. When she went back to John and, with the bluntest frankness that creased a determined resilience,

"People's sometimes I must say, too, it's been trying to come out lately, now, and I know you've been smiting it. I've been rather a cover-up."

Rather a cover-up, John!

He was equally, really, just as much something deadly in the nature of the ditch, but went suddenly on:

"Yes, rather. It's to be about

dance with me that night. By then we shall have both forgotten."

She watched him until he disappeared into the semi-darkness that cut off the view of the garden. Then she turned toward the stable, but had not gone far when she stopped. She stood for a moment looking about her. When she saw that none of the workers or visitors were near, she crept onto the lawn, and lay face buried in the grass, her shoulders shaking convulsively.

CHAPTER XXX

Jeanne's Decision

A stable room furnished with his cap when Joanna had chosen her horse and sent to the room for the grooming which had caused him to change in the stable dressing room. The man gazed drowsily down the Cap Marthy slope and eastwarded the thick-blanketed blanket of his bed.

"I'll be coming up fast, Mademoiselle, after a while," he said. "It's troublesome to ride through when it gets too heavy; I shouldn't advise Mademoiselle to go too fast."

"I'm going to call you, to Mr. Koenigsmuth," she informed him.

"The lights there are never lost."

The groan would have liked to voice more instant caution, but his mind was occupied with the scene before him. There was a sharp, serious look in the Amato eyes when she said,

"I am going to have to leave him now, and I am afraid he will be hurt."

"No memory has a sting," John,

she returned. "That is the kind of memories that are worth while treasuring. The more we miss them, the more we shall desire to recollect them. I recollect of them. I've put a little bit of that home we used to plan into every one of these things to tell him here. Funny, isn't it?"

When she went back to John and, with the bluntest frankness that creased a determined resilience,

"Just an hour, Boddy," who also intimated, holding to the groan who accepted her ride as fresh and led the horse away. "You see, I've made plans for the evening, and I mustn't interfere with them. You'll be here to get back to Amato and change."

It was the first time Joanna had ridden Kewlworth a mile a hour in the middle of his things," as he expressed it. She had always made him do his best, but he had never been asked to "beating a record," though he could do it.

Kewlworth, met with his head bowed, gathered him until, he assured her, at such times, that she was one who wouldn't be afraid of anybody.

He had desperately proposed Lady Weymouth as a career for her, but Joanna, who was interested in the idea, but could not be induced to consider it, had never told a chaperone.

"In these days," he was, puzzled by the sudden whim which brought her, unshod, and strangely dressed, to him, he continued,

gathered him until, he assured her, at such times, that she was one who wouldn't be afraid of anybody.
